

## Complimentary and Supplementary angles

The measure of an angle is  $179^\circ$ . What is the measure of a supplementary angle?

The measure of an angle is  $69^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $34^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $62^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $6^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $50^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $77^\circ$ . What is the measure of a supplementary angle?

The measure of an angle is  $14^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $3^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $30^\circ$ . What is the measure of a complementary angle?

The measure of an angle is  $95^\circ$ . What is the measure of a supplementary angle?

The measure of an angle is  $2^\circ$ . What is the measure of a supplementary angle?
